## ABSTRACT

This document consists of 6 figures and 67 tables that together present national, regional, and state profiles of those individuals aged 16 years and older who have not attained a high school diploma or equivalent and are not currently enrolled in school. Included in the tables are the following target population characteristics: number of years of school completed, ages, gender, English proficiency, status with regard to poverty level, and race and/or ethnicity. Also included are a description of the database on which the tables are based and glossary of terms used in the tables. Among the data presented are the following: more than 44 million adults (nearly 27% of the adult U.S. population) possess limited literacy capability; within the individual states, the percentage of adults in the target population for adult education ranges from 15% in Alaska to 37% in Mississippi; of the target population, 39% have completed 8 or fewer years of education and 10% have completed 4 or fewer years; English is the second language of 23% of the adult education target population; about one quarter of the target populations lives at or below the poverty level; and the target population is 67% White, 16% African American, 13% Hispanic, 2% Asian or Pacific Islander, and less than 2% other. ## **SECTION 1: OVERVIEW AND NATIONAL PROFILES**

The primary purpose of this document is to present national, regional, and state profiles of the target population for adult education, that is, those individuals aged 16 years and older, who have not attained a high school diploma or equivalent and are not currently enrolled in school. The state profiles were previously disseminated to state directors of adult education at regional conferences in the spring of 1993. Since that time, regional and national profiles have been developed as well.

The tables contained in this report describe the following characteristics of the target population: the number of years of school they have completed, their ages, their gender, their proficiency with the English language, their status with regard to poverty levels, and their race and/or ethnicity.

In the first section of the report we provide a brief overview of the adult education program as administered by the U.S. Department of Education, a description of the data base on which the tables are based, and a glossary of terms used in the tables. Section 1 concludes with a discussion of the adult education target population at the national level.

The second section presents tables describing the target population within each of the four areas into which the states are divided for administrative purposes (Northeast, South, Midwest, and West); and the third section presents the same information for each state and the District of Columbia, with the states arranged alphabetically.

### **Overview of the Program**

For more than 25 years, the Adult Education Act (AEA) has provided funds to assist states in establishing and expanding basic education programs for individuals age 16 and over who have not completed high school. The types of services and providers funded by AEA, as well as its target population, have changed a number of times since the program began in 1966, including changes contained in the 1988 reauthorization of the Act and 1991 National Literacy Act (NLA). This legislation introduced a requirement for states to emphasize services to individuals with skills below the fifth grade level and to ensure equal access to

federal funds for an expanded group of providers including virtually any type of organization. At the same time, it increased the level of "matching" funds to be provided by state and local sources, capped administrative costs, and required states to develop and use indicators of program quality to evaluate the effectiveness of local programs.

The adult education program is administered by the Division of Adult Education and Literacy (DAEL) in the Office of Vocational and Adult Education, U.S. Department of Education. AEA provides funding to states to establish and expand basic education programs for adults. More specifically, its purpose is:

to assist States to improve educational opportunities for adults who lack the level of literacy skills requisite to effective citizenship and productive employment, to expand and improve the current system for delivering adult education services including delivery of such services to educationally disadvantaged adults,<sup>1</sup> and to encourage the establishment of adult education programs that will--

- (1) enable these adults to acquire the basic educational skills necessary for literate functioning;
- (2) provide these adults with sufficient basic education to enable them to benefit from job training and retraining programs and obtain and retain productive employment so that they might more fully enjoy the benefits and responsibilities of citizenship; and
- (3) enable adults who so desire to continue their education to at least the level of completion of secondary school (Adult Education Act, P.L. 100-297, 1988, Section 1201).

"Adult education" is defined as services or instruction below the college level for those 16 or older who have not completed secondary school, are not currently enrolled (or required to be enrolled), and:

who lack sufficient mastery of basic educational skills to enable them to function effectively in society or . . . whose lack of mastery of basic skills results in an inability to speak, read, or write the English language, which constitutes a substantial impairment of their ability to get or retain employment commensurate with their real ability. . . .

---

<sup>1</sup>"Educationally disadvantaged adults" are persons who demonstrate basic skills at or below the fifth grade level, or who have been placed in the lowest or beginning level of an adult education program that does not use grade level equivalents as a measure of students' basic skills (P.L. 100-297, 1988, Section 1201a(2)-(3)).

The *Federal Register* of June 5, 1992, which contains the current regulations for the program, describes the means by which states receive funding under the Act and the requirements it imposes on them. A state education agency must submit a four-year plan that discusses the needs of its adult population, how it will address those needs, and how it will ensure joint planning and coordination with other federal and state programs. The plan must address the needs of adults with limited or no English proficiency, immigrants, minorities, incarcerated persons, adults with disabilities, and persons who are chronically unemployed, homeless, or disadvantaged. Each state receives a basic annual allotment (\$250,000 for fiscal year 1900); remaining funds are allotted based on census data showing the number of persons in each state who are 16 years of age or older and lack a high school diploma or equivalent.<sup>2</sup>

### 1990 Census of Population and Housing

The data base we used to construct the tables for this report was the 1990 Census of Population and Housing, specifically the Public Use Microdata Samples (PUMS). We prepared tables for variables contained in the PUMS that were of interest to DAEL. Several of the data items contained here, including educational attainment and English proficiency, were not collected for the entire United States population but only for a sample of the population. The PUMS data base contains these data items (as well as all other data items on both the Long and Short Census Forms) for a five percent sample of the households in the country, with sampling weights to generate estimates of the total population. Therefore, the tables contained here present statistically derived estimates of the numbers of individuals within specific categories for each state.

### Definition of Terms

For the purposes of this report, we have defined the following terms as indicated below:

***Adult population:*** individuals aged 16 years and older.

---

<sup>2</sup>The "formula" population (versus the target population) includes all adults over 16 without a high school diploma, including persons who are enrolled in high school.

**Adult education target population:** individuals aged 16 years and older, who have not attained a high school diploma or equivalent and are not currently enrolled in school.

**ESL:** English as a second language; this term is used to describe members of the target population who speak English as a second language, regardless of their level of proficiency in English.

**LEP:** limited English proficient (or proficiency); this term is used to describe members of the target population who speak English as a second language and who have rated their ability to speak English as "well," "not well," or "not at all." It does not include ESL adults who speak English "very well."

**LEP adults with diploma:** adults with limited English proficiency (as defined above) who have attained a high school diploma or equivalent.

**Level of educational attainment:** the number of years of school completed.

**Poverty status (100 percent):** whether or not the individual's household income is equal to or less than 100 percent of the poverty threshold for a household of that size and composition, as calculated by the Census Bureau and based on guidelines from the Social Security Administration and the Office of Management and Budget.

**Poverty status (125 percent):** whether or not the individual's household income is equal to or less than 125 percent of the poverty threshold for a household of that size and composition, as calculated by the Census Bureau and based on guidelines from the Social Security Administration and the Office of Management and Budget.

**Race/Ethnicity:** we used the primary race categories defined by the Census, within the designations of Hispanic Origin.

### **National Profile of the Adult Education Target Population**

We prepared a basic set of 10 tables for each of the states, describing the adult education target population for the state in terms of the variables indicated previously: level of educational attainment, age, gender, English language ability (for speakers of English as a second language), poverty, and race/ethnicity (*see Section 3*). These tables may be useful to individual states in planning outreach and services for this population.

This basic set of 10 tables was also prepared for each of the four service areas -- Northeast, South, Midwest, and West (*see Section 2*). For the nation as a whole, we prepared not only those same 10 tables (*see Tables A through H, included at the end of this section*)

but also a number of tables that provide a quick overview of the differences among the states (see *Tables 1 through 4*). Before moving on to the individual tables, though, we present below some of the highlights of the national data.

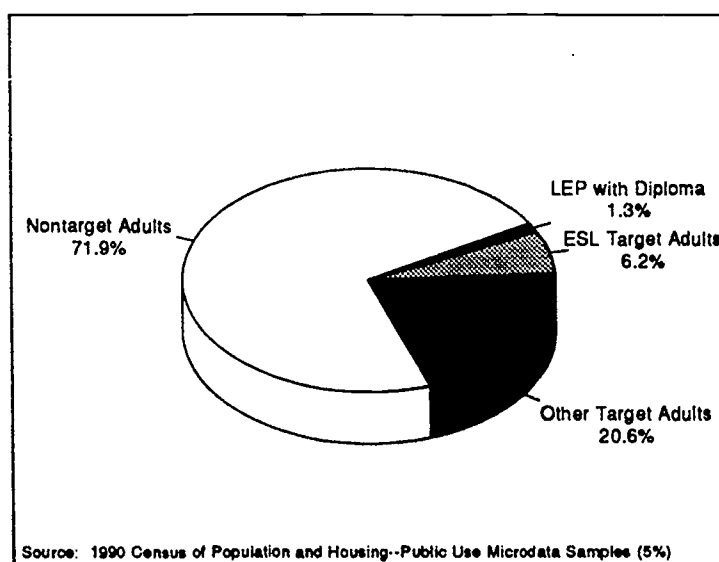

### Highlights of the National Data on the Adult Education Target Population

- More than 44 million adults, or nearly 27 percent of the adult population of the United States, possess limited literacy capability -- that is, they have not completed a high school diploma or its equivalent. These individuals make up the adult education target population (see *Figure 1 and Tables A and B*).

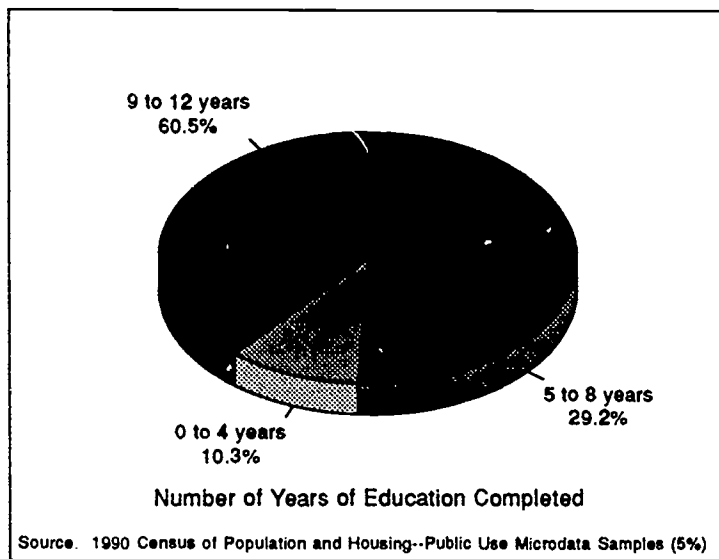

Within individual states, the percentage of adults in the target population ranges from a low of 15 percent in Alaska to a high of 37 percent in Mississippi. In seven states, more than one-third of all adults fall within the adult education target population (*Table 1*).

- Eight states have over a million and a half individuals in their adult education target populations (*Table 1*).
- Of the target population, 39 percent (or more than 10 percent of the total adult population) have completed eight or fewer years of education.
- A group that has received special emphasis in the legislative mandate, those adults who have completed four or fewer years of schooling, constitutes 10 percent of the target population (*Figure 2, Table A*), or three percent of the total adult population. These percentages are reduced by about half (to five and one percent, respectively) if we include only those who are less than 60 years old (*Tables 2 and 3*).
- For 23 percent of the adult education target population, English is their *second* language. Thus, adult education programs need to reach large numbers of individuals who may have limited proficiency in English (*Figure 3, Table E-1*).

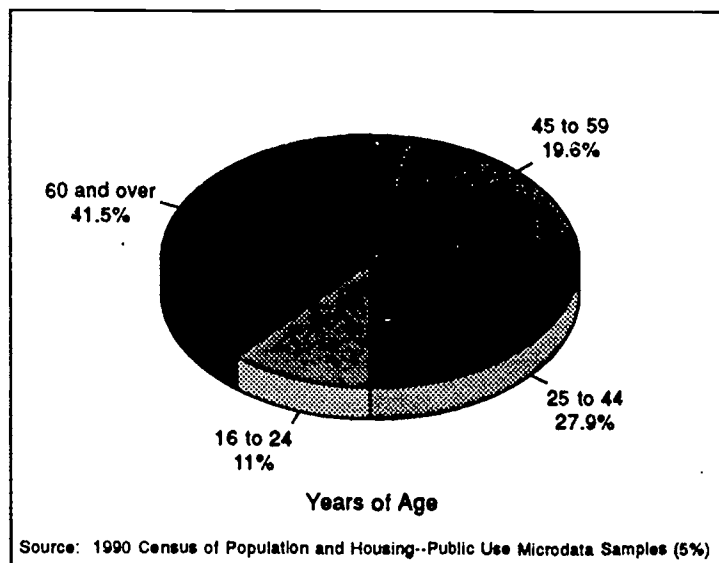

In 11 states, more than one-third of the members of the target population speak English as a second language; in three states the proportion of ESL speakers exceeds one-half (*Table 4*).

**Figure 1. Targeted and Total Adult Population**

**Figure 2.** Education Level of Adult Education Target Population

**Figure 3.** Ages of Adult Education Target Population

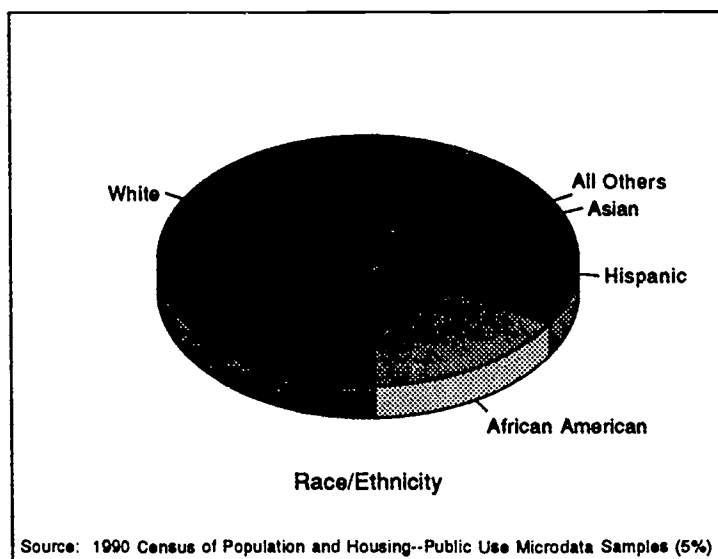

- In addition to the individuals with ESL in the target population, an additional two million adults, although they have completed high school, speak English (their second language) less than "very well." These adults are not technically members of the target population, but they have a need for and demand services from adult education programs because of their limited English proficiency. If this group were added to the target population, they would constitute five percent of that total (*Tables 4, E-2, and E-3*).

States with the largest numbers of limited English proficient adults with diplomas include: California, New York, Texas, Florida, New Jersey, and Illinois. The numbers of such individuals in these states range from 110,000 to over 560,000 (*Table 4*).

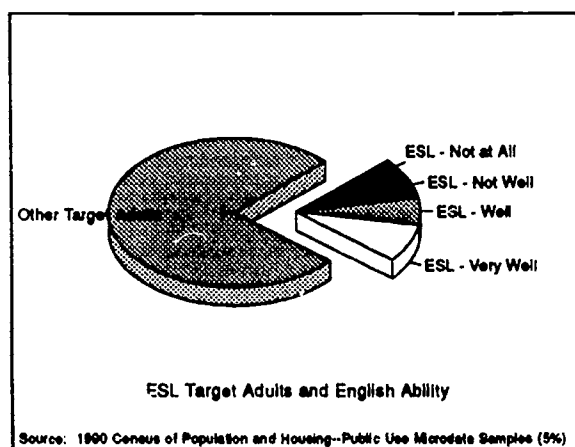

- Women and men are distributed in the target population in roughly the same proportions as in the general population: 52.5 percent female and 47.5 percent male.

- Forty-one percent of the adult education target population is 60 or more years old, while only 11 percent is 16-to-24 years old (*Figure 4, Table C*).
- About one quarter of the target population lives in households that are considered at or below the poverty level (*Figure 5, Tables F and G*).
- With regard to the racial/ethnic distribution of the members of the target population, about 67 percent are white, 16 percent are African American, 13 percent are of Hispanic origin, two percent Asian or Pacific islander, and less than two percent American Indian, Eskimo, Aleutian, or other (*Figure 6, Table H*).

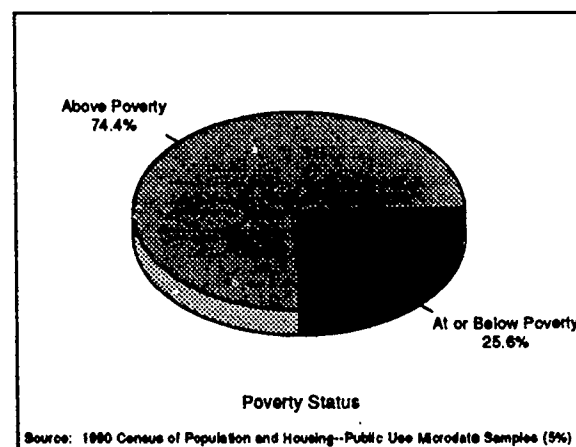

Tables 1 through 4, which follow, provide an overview of the variability across states on the size and percentages of the adult education target population (*Table 1*), the target adults with eight or fewer years of education (*Tables 2 and 3*), and numbers of ESL target adults and limited English proficient adults who have attained a diploma or equivalent (*Table 4*).

## **SECTION 2: REGIONAL PROFILES OF THE ADULT EDUCATION TARGET POPULATION**

The tables in this section are organized by the service areas defined by the Division of Adult Education and Literacy and are presented in the following order:

<b>Area 1, Northeast:</b>	Connecticut	New Hampshire
	District of Columbia	New Jersey
	Delaware	New York
	Maine	Pennsylvania
	Maryland	Rhode Island
	Massachusetts	Vermont
<b>Area 2, South:</b>	Alabama	North Carolina
	Arkansas	Oklahoma
	Florida	South Carolina
	Georgia	Tennessee
	Kentucky	Texas
	Louisiana	Virginia
	Mississippi	West Virginia
<b>Area 3, Midwest:</b>	Illinois	Missouri
	Indiana	Nebraska
	Iowa	North Dakota
	Kansas	Ohio
	Michigan	South Dakota
	Minnesota	Wisconsin
<b>Area 4, West:</b>	Alaska	Nevada
	Arizona	New Mexico
	California	Oregon
	Colorado	Utah
	Hawaii	Washington
	Idaho	Wyoming
	Montana
